

THEMATIC SESSION ON GEOGRAPHIC ENGINEERING, GEODESY AND TOPOGRAPHY (TS10)

ORGANIZERS

Pedro Almeida, UBI, PT
Rui Fernandes, UBI, PT
Bertha Santos, UBI, PT

AIM AND SCOPE OF THE SESSION

This session will address issues related with Geographic Engineering, Geodesy and Topography in problem definition and solution optimization. Considering the session's purpose, research and development topics covering these types of issues are welcome, addressing the dissemination in different engineering and planning optimization procedures.

RECOMMENDED (but not exclusive) TOPICS

- 1 - Territory management and planning
- 2 - World and Local Reference Frames
- 3 - Geosciences development and support
- 4 - Solid Earth and Atmospheric Applications
- 5 - Space and Ground based technologies
- 6 - GeoData Management
