

## **THEMATIC SESSION ON**

**Air Transport (TS15)**

## **ORGANIZERS**

Jorge Silva  
UBI, PT; CERIS/CESUR, PT

Rosário Macário  
IST/UL, PT; CERIS/CESUR, PT

## **AIM AND SCOPE OF THE SESSION**

Air transport occurs in a complex environment due to the diversity of agents and the sectors of activity that are involved. It is not easy to establish a direct relationship between air transport and all those agents and sectors, but the potential of the catalytic effects in which they are concerned is easily recognized. These catalytic effects manifest themselves at various levels, scientific and technological, and this special session seeks to identify, discuss, and exploit them.

## **RECOMMENDED (but not exclusive) TOPICS**

1. Air Transport and Airports
2. Flight Safety and Security
3. Aircraft Operations
