

THEMATIC SESSION ON Fibrous Material - TS16

ORGANIZERS

Rogério Manuel dos Santos Simões (UBI, PT)

AIM AND SCOPE OF THE SESSION

The aim of this thematic session is to bring together experts from biopolymers, synthetic, artificial and natural fibers to present the latest research and results related to the fields of biopolymers, biomaterials, textile, and paper products. This session provides opportunities for delegates from different areas of specializations to exchange ideas and experiences, to contribute to design and develop advanced fibrous and composites materials with new functionalities based on natural fibers and biopolymers.

RECOMMENDED (but not exclusive) TOPICS

- 1 - Biopolymers
- 2 - Synthetic and natural fibers: physical and chemical characterization
- 3 - Fibrous material
- 4 - Composite materials
